EXPERIENCE

Full-Stack Tech Lead Software Engineer

Mar. 2023 – Present

Booz Allen Hamilton

San Francisco, CA

- Spearheaded a team of 6 to build a classified record-collaboration platform from 0→1 using Angular, NestJS, and PostgreSQL, now poised for production deployment.
- Established coding standards and mentored junior engineers, slashing onboarding from 1–2 weeks to just days via comprehensive docs and containerized dev environments.
- Drove cross-functional collaboration with product managers and engineers to hit milestone deadlines consistently.
- Designed and optimized PostgreSQL schemas, and implemented centralized logging plus shared utility libraries to ensure long-term maintainability.

Cofounder / Lead Software Engineer

Apr. 2025 – Present (Concurrent)

Stealth Fintech Startup

Remote

- Architected and led development of a modular fintech platform using Go, GraphQL, Supabase, Swift, and TypeScript.
- Solely designed and implemented the backend API in Go powering secure authentication and payment flows.
- Iterated rapidly with cofounders on MVP requirements and delivered production-ready features.

Lead Front-End / Full-Stack Software Engineer

Apr. 2021 – Mar. 2023

Deloitte

Orlando, FL

- Led a front-end team of 3 building an internal BPMN workflow automation tool, adopted across multiple teams. Worked with integrating the Python FastAPI to the front-end
- Built key features of a Wickr-based medic bot, enabling US military transition to modern battlefield communication protocols.
- Full-stack engineer on TaxPro application serving millions of users in production, developing scalable backend services using Java Spring Boot with RESTful APIs and microservices.

DevOps Engineer

Jun. 2020 – Apr. 2021

Asurion / uBreakiFix (Startup)

Orlando, FL

- Led the modernization of cloud infrastructure and CI/CD automation for a business management platform used by hundreds of uBreakiFix (startup bought by Asurion) franchises nationwide in production and did daily production deployments.
- Migrated Jenkins CI/CD pipelines to AWS CodeBuild and CodePipeline, resulting in faster deployments, increased developer productivity, and significant cost savings through efficient pipelines, containerized environments, and auto-scaling resources.

PROJECTS

Full Stack Real-Time AI Chat App | *JS/TS, React, Node/Express, Next, Tailwind, Mongo, Postgres, Firebase, Heroku, Vercel, GCP*

Jan. 2023 – Apr. 2024

- Architect & built a full-stack application that allows users to message each other and communicate with different models of ChatGPT.
- [Live Demo](#) | [GitHub Repo](#)

OMSHUB (Open Source Contributor) | *React, Next, TypeScript, Node, FireBase, Jest*

Jun. 2024 – Jan. 2025

- OS full-stack contributor to website for rating GATech courses.
- [Live Site](#)

Custom User Authentication and Authorization Microservice | *Node, TypeScript/JS, Express, Mongo, Docker, Jest, Postgres*

Jan. 2023 – Jan. 2024

- Developed a reusable user authentication and authorization service/plugin with full password encryption and 90%+ test coverage using test-driven development and OAuth integration as well as JWT.
- [GitHub Repo](#)

EDUCATION

Georgia Institute of Technology

Atlanta, GA

Master's of Science, Computer Science, Specialization in AI/Machine Learning (ML) GPA: 4.0 Jan. 2024 – Anticipated May 2027

Oregon State University

Corvallis, Oregon

Bachelor's of Science, Computer Science

Jun. 2017 – Apr. 2020

TECHNICAL SKILLS, HACKATHONS & CERTIFICATES

Languages: JavaScript/TypeScript, Go, Python, Java, HTML/CSS

Frameworks/Libraries: React, Node.js, Express, Next.js, FastAPI, Nest.js, Spring Boot, GraphQL, Pytorch, TensorFlow, OpenAPI, sklearn, Tailwind

Tools/Technologies: Docker, AWS, Google Cloud Platform (GCP), Jenkins, PostgreSQL, Firebase, MongoDB, Redis, Supabase

Hackathons: Deloitte NFT: 2nd Place, AGI House (AI Finance), 4 x Strong Compute (AI Chess Models Battle x2 quarterfinals, 1 x ARC-AGI-2, 1 x DeepSeek R1 Finetuning, 1 x placement at AWS MCP)

Certificates: Google Cloud Associate Engineer
